

**Training Services**  
**OpenEMIS Advanced Lab**  
**(OESC07TS05)**

**Description**

This course is designed for OpenEMIS administrators, who require customized and advanced training on key areas of the system. The Advanced Lab training gives OpenEMIS administrators an opportunity to work with software developers, data experts, trainers and education planners during the visit.

**Learning Outcome(s)**

Knowledge and skills to confidently manage specific part of the OpenEMIS ecosystem.

**Deliverable(s)**

- Trained persons (maximum 4)
- Daily participant attendance sheets
- Course evaluation forms

**Duration**

The duration of this activity is flexible and based on requested learning outcomes.

**Location**

The training is available both onsite (Singapore or India lab).

**Prerequisite(s)**

Participants are expected to have knowledge of education management and information systems, experience with OpenEMIS and have successfully completed the OpenEMIS Professional and Administrator training courses.

**Assessment**

The course participants are expected to engage in class discussion and complete practical exercises however they are not assessed.

**Certification**

Participants shall be issued a certificate of participation after attending the course.

**Topics**

The course can cover a range of topics depending on the priorities.
